## **ABSTRACT:**

Charity is an act of kindness, where a person who has financially more than enough of what he or she needs contributes a part of his or her surplus income for the fulfilment of the needs of those who are less capable. The majority of NGOs have experienced difficulties in getting funds or other required things. Getting a donor is a very hard task, and sometimes dealing with some donor's conditions can be a big challenge for NGOs to fulfil. Donors too want to donate but due to diverse ranges of NGOs they might get overwhelmed. Also in this busy life, they barely have time for lengthy processes for donating to a charity.

## **INTRODUCTION:**

### **1.1 Background**

Charity is an act of kindness, where a person who has financially more than enough of what he or she needs contributes a part of his or her surplus income for the fulfilment of the needs of those who are less capable. The majority of NGOs have experienced difficulties in getting funds or other required things. Getting a donor is a very hard task, and sometimes dealing with some donor's conditions can be a big challenge for NGOs to fulfil. Donors too want to donate but due to diverse ranges of NGOs they might get overwhelmed. Also in this busy life, they barely have time for lengthy processes for donating to a charity.

### **1.2 Objective of the Project**

This project provides a website to organize many Charity and fund-raising events. Through this anyone can raise a charity with proper details and anyone can donate to various causes. This website can be used for large Associations like Red-cross or small associations like NGOs in VIT. Our Aim is providing a platform for many kind people to help those in need and those in need to get help. Hence this not only contributes to the society but also enables people to help many others in today's busy world.

## **PROBLEM STATEMENT:**

In the recent times, the charity organization has been growing at a great pace with its peculiar challenges just like any other industry. The main problems faced by charity organizations as identified are as follows:

- i. Donors manually book appointments, and the owners of these firms write down same appointments in diary and forget most of them due to the high number of donors.
- ii. Overwhelming calls from donors who only wish to know more about the services and not necessarily book an appointment.
- iii. Although, most of these charity organizations have attracted a good number of donors and NGOs, they are yet to achieve the desired number of individuals/donors as originally planned.

Therefore, the aim of this project is to mainly resolve these problems by designing a web-based system to the charity management systems in the charity organizations that includes the following features by just one click on a link:

- i. A brief introduction to the charity organization and a small profile about the organization owners and volunteers
- ii. A page that includes all the services offered by the organization.
- iii. Contact details.
- iv. Brief introduction to the charity funding
- v. The donors should be able to carry out due diligence of the organizations via the web

## **MODULES:**

This charity management system has three modules namely, Admin, NGO and Donor.

### **Administrators Detailed Attribute**

- Admin can login using credentials and manage the request raised by the NGO by rejecting it.
- Admin can just reject/delete the NGO if he is not satisfied with it and those charities will not appear to users for donation.
- Admin will get the report of NGOs who get donations.
- Admin can login into the system using fixed credentials.

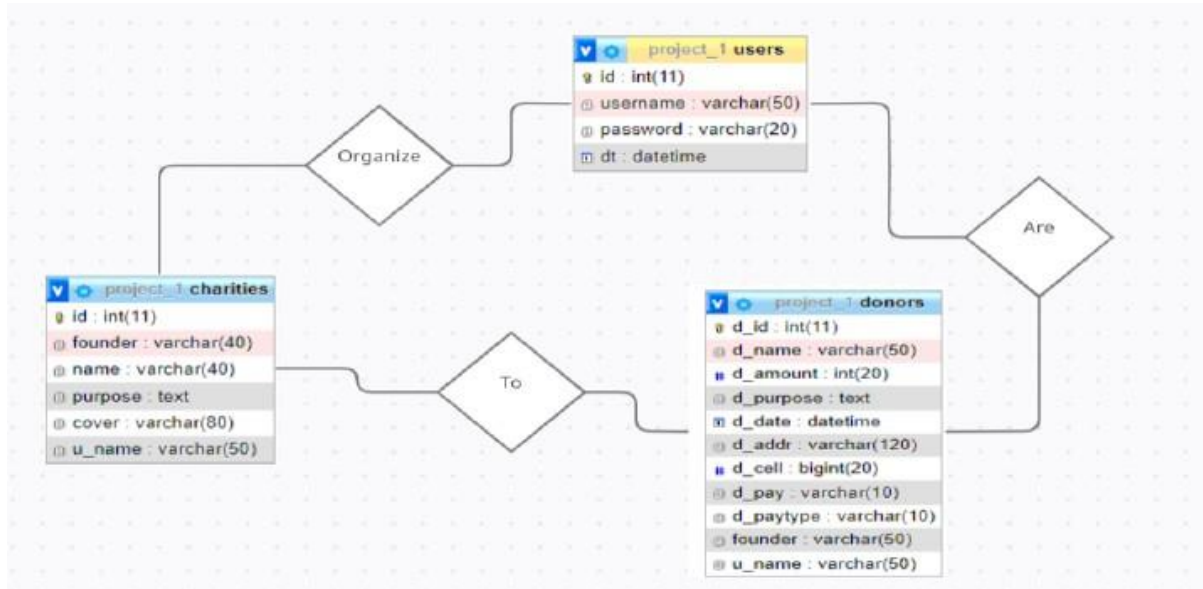

### **Ngo View**

- NGOs (a user) can register and login on the system using valid credentials.
- NGOs can raise requests for any cause in need by filling a form consisting of some details like the name, purpose and a cover picture. They can view the previous charities list and donation report.
- It is important to know that the NGO module here is user only but for differentiating the functionality we are stating them as NGOs (but they can be donors as well).

### **Donors View**

- Donors (also a user) can simply register and login using credentials.
- Donors can view the different charities list and can donate to them by filling a donation form with some details.
- They can see their donation history and will have an option to edit some details they want and also delete a record.

## ER-DIAGRAM:

## DATABASE DESIGN:

MySQL database is used to save software data for this project. MySQL is relational database management, and it is free of charge. All of the information is kept in a select- editable, and every table has particular range columns and rows. It has 3 tables named as charities, donors, users.

### Database Structure

The screenshot shows the phpMyAdmin interface for the 'project\_1' database. The left sidebar lists the database structure, including 'project\_1' and its tables: 'charities', 'donors', and 'users'. The main panel displays the 'Structure' tab for the 'project\_1' database, showing a table with 3 tables and a sum of 14 rows.

Table	Action	Rows	Type	Collation	Size	Overhead
charities	Browse Structure Search Insert Empty Drop	5	InnoDB	utf8mb4_general_ci	16.0 K	-
donors	Browse Structure Search Insert Empty Drop	2	InnoDB	utf8mb4_general_ci	16.0 K	-
users	Browse Structure Search Insert Empty Drop	7	InnoDB	utf8mb4_general_ci	16.0 K	-
3 tables	Sum	14	InnoDB	utf8mb4_general_ci	48.0 K	0 B

## Database Constraints

- The id of users, charity id & d\_id of donors is declared as Primary Key and auto increment constraint is applied to avoid any fraud entry in database.
- The dt in table users is timestamp that shows the user registration date.
- The ddate in donors table is a timestamp that show the date of donation

## Database Table Field

### USERS

The image displays two screenshots from the phpMyAdmin interface. The top screenshot shows the 'Table structure' view for the 'users' table. The bottom screenshot shows the 'Query results' view for the same table.

**Table structure view:**

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	username	varchar(50)	utf8mb4_general_ci		No	None			<a href="#">Change</a> <a href="#">Drop</a> <a href="#">More</a>
2	password	varchar(20)	utf8mb4_general_ci		No	None			<a href="#">Change</a> <a href="#">Drop</a> <a href="#">More</a>
3	dt	datetime			No	current_timestamp()			<a href="#">Change</a> <a href="#">Drop</a> <a href="#">More</a>
4	id	int(11)			No	None		AUTO_INCREMENT	<a href="#">Change</a> <a href="#">Drop</a> <a href="#">More</a>

**Query results view:**

Showing rows 0 - 6 (7 total, Query took 0.0018 seconds.)

```
SELECT * FROM `users`
```

Options: ☐ Show all | Restore column order | Number of rows: 25 | Filter rows: Search this table | Sort by

## Donors

The screenshot shows the phpMyAdmin interface with the 'Table structure' tab selected for the 'donors' table. The table structure is as follows:

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	d_name	varchar(50)	utf8mb4_general_ci		No	None			Change Drop More
2	d_amount	int(20)			No	None			Change Drop More
3	d_purpose	text	utf8mb4_general_ci		No	None			Change Drop More
4	d_date	datetime			No	current_timestamp()			Change Drop More
5	d_addr	varchar(120)	utf8mb4_general_ci		No	None			Change Drop More
6	d_cell	bigint(20)			No	None			Change Drop More
7	d_pay	varchar(10)	utf8mb4_general_ci		No	None			Change Drop More
8	d_paytype	varchar(10)	utf8mb4_general_ci		No	None			Change Drop More
9	founder	varchar(50)	utf8mb4_general_ci		No	None			Change Drop More
10	u_name	varchar(50)	utf8mb4_general_ci		No	None			Change Drop More
11	d_id	int(11)			No	None		AUTO_INCREMENT	Change Drop More

Below the table structure, there are options to 'Check all', 'With selected', 'Browse', 'Change', 'Drop', 'Primary', 'Unique', 'Index', 'Spatial', and 'Fulltext'. There are also buttons for 'Add to central columns' and 'Remove from central columns'.

The screenshot shows the phpMyAdmin interface with the 'Query results' tab selected for the 'donors' table. The query results are as follows:

Showing rows 0 - 1 (2 total, Query took 0.0016 seconds)

```
SELECT * FROM `donors`
```

## **CONCLUSION:**

Charity is an act of kindness, where a person who has financially more than enough of what he or she needs contributes a part of his or her surplus income for the fulfilment of the needs of those who are less capable. The majority of NGOs have experienced difficulties in getting funds or other required things. Getting a donor is a very hard task, and sometimes dealing with some donor's conditions can be a big challenge for NGOs to fulfil. This charity management system will help NGOs to find donors easily. The website is developed with an administrative and a non-administrative section. Only authenticated administrative members can access the administrative area. The system provides features that facilitate users with no web-programming knowledge to manage web contents without any dependency on webmasters. Administrators can add, manage web contents of the main user website. The non-administrative part is for the general public (NGOs and Donors) where the users can register/login, raise charities and can donate to the charities of their own interests

In conclusion, the quest to conquer the manual method of donating money has been turned into an online experience.

## SNAPSHOTS:

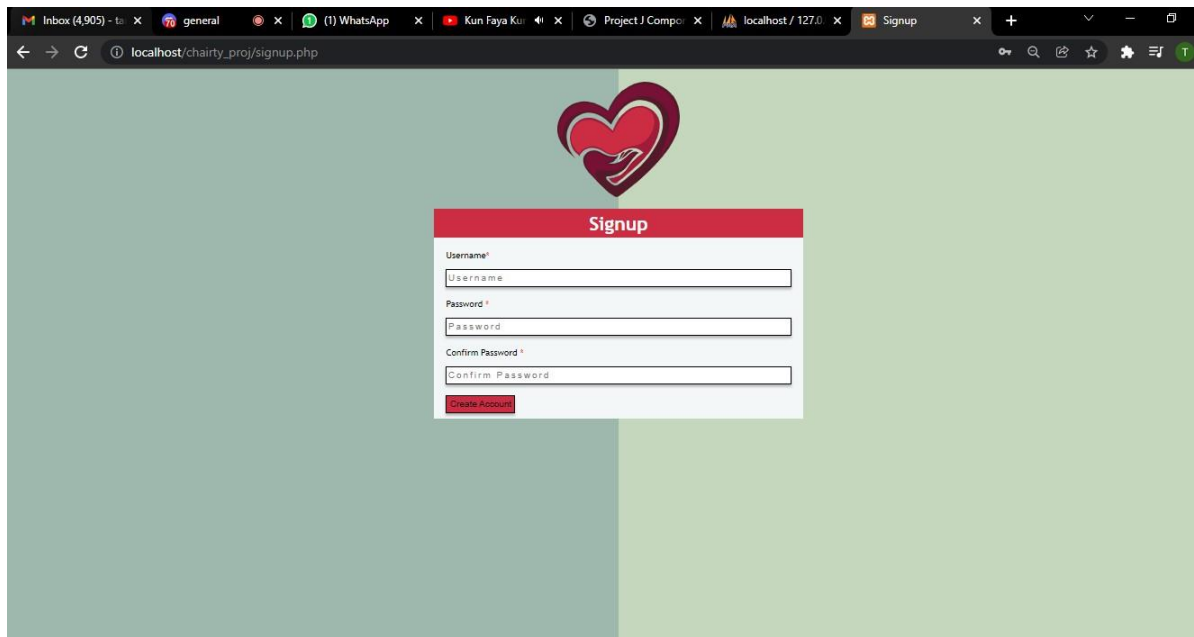

### HOMEPAGE

### LOGIN PAGE

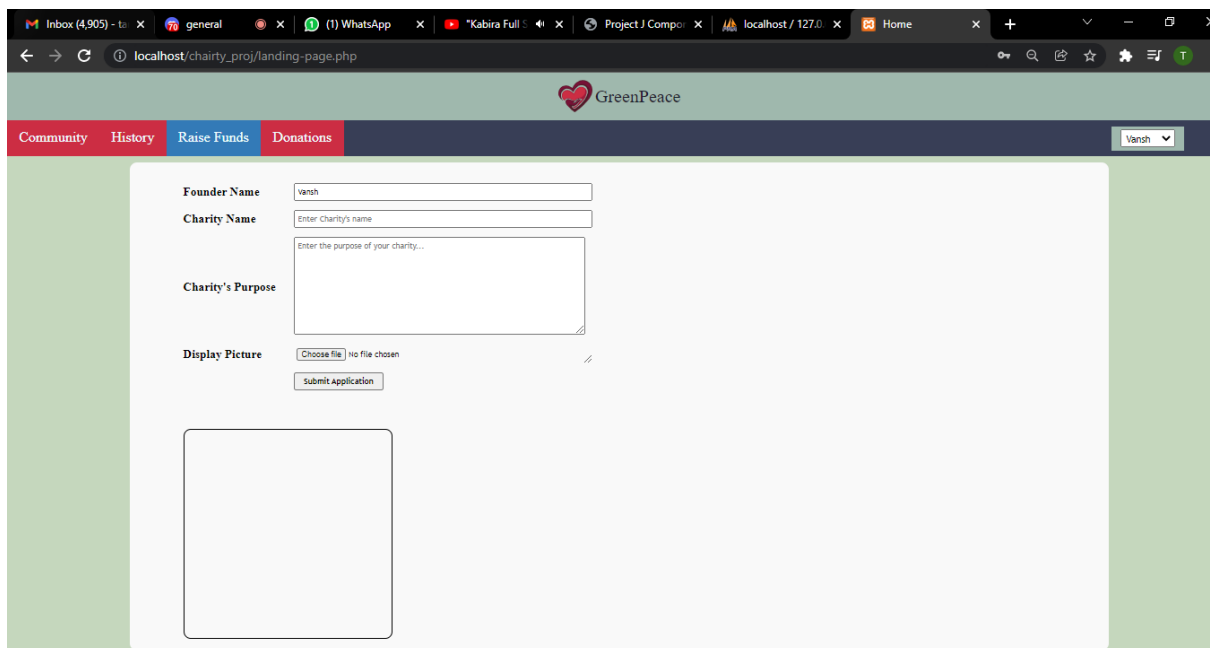

## SIGNUP PAGE

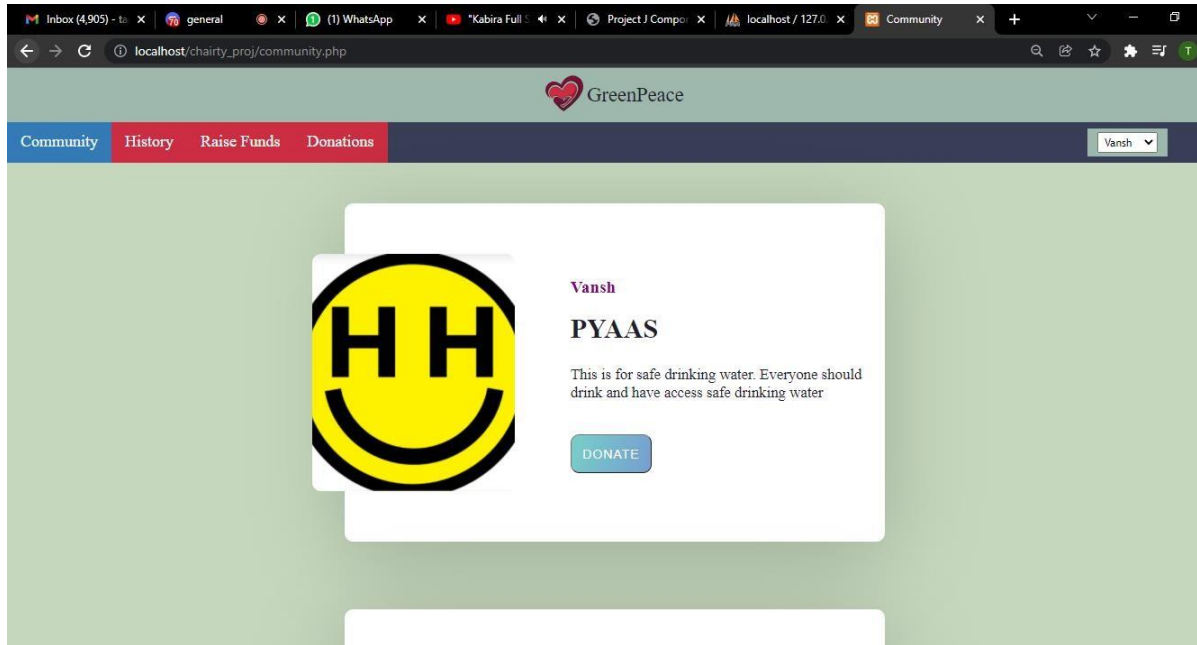

A screenshot of a web browser showing the 'Signup' page. The browser's address bar displays 'localhost/charity\_proj/signup.php'. The page has a light green background with a large, stylized heart icon in the center. Below the heart is a white box with a red header labeled 'Signup'. Inside this box are three input fields: 'Username', 'Password', and 'Confirm Password'. Below these fields is a red button labeled 'Create Account'.

## ADD CHARITY PAGE

A screenshot of a web browser showing the 'Add Charity' page. The browser's address bar displays 'localhost/charity\_proj/landing-page.php'. The page has a light green background with a dark blue header. The header contains the 'GreenPeace' logo and a navigation menu with 'Community', 'History', 'Raise Funds', and 'Donations'. A dropdown menu on the right shows 'Vansh'. The main content area is a white box with a light green border. It contains four input fields: 'Founder Name' (with 'Vansh' entered), 'Charity Name' (with 'Enter Charity's name' entered), 'Charity's Purpose' (with 'Enter the purpose of your charity...' entered), and 'Display Picture' (with 'Choose file' and 'no file chosen' text). Below these fields is a 'Submit Application' button. A large, empty square box is at the bottom of the form.

## DISPLAY ALL CHARITY PAGE

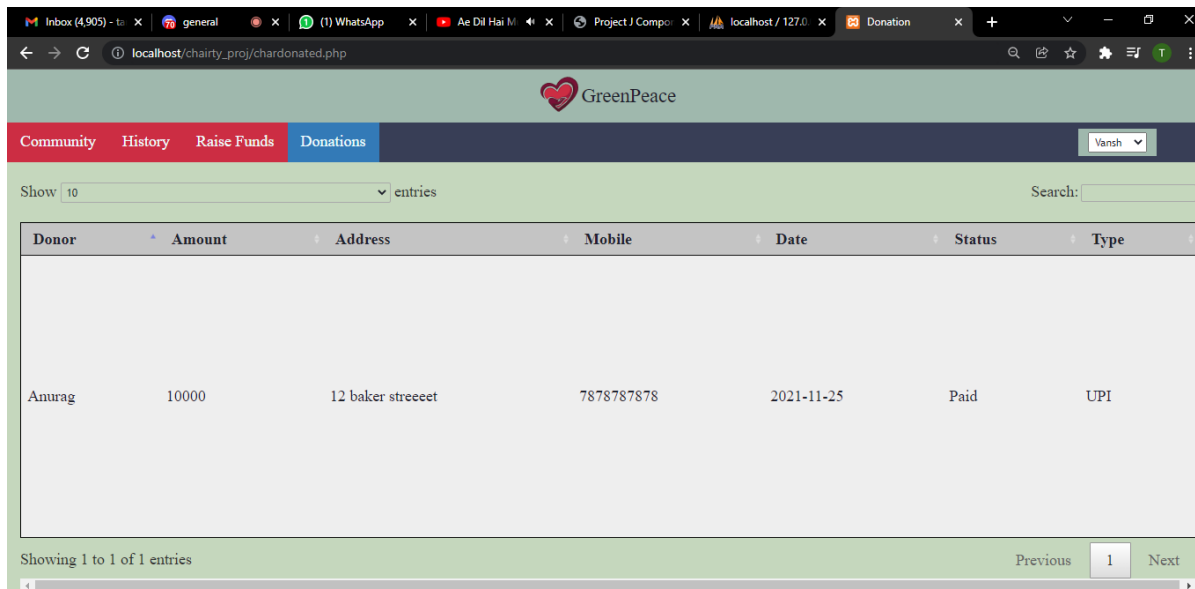

## DONATION FORM

The screenshot shows a web browser displaying the GreenPeace Donation Form. The URL is localhost/chaity\_proj/donate.php?id=3. The page has a navigation bar with links: Community, History, Raise Funds, and Donations. A user profile dropdown shows 'Vansh'. The main content area features a donation form titled 'DONATE FORM'. The form includes the following fields:

- Donor Name: Enter name
- Amount: Enter amount
- Address: Enter address
- Contact Number: Enter you contact number
- Payment: SELECT
- Payment Type: SELECT
- Paying to: Anurag
- Purpose of donation: This will help a skin cancer patient

At the bottom of the form is an 'Add Donation' button.

<p>

GreenPeace is a website to organize many Charity and fund-raising events. Through this anyone can raise a charity
with proper details and anyone can donate to various causes. This website can be used for large Associations like
Red-cross or small associations like NGOs in VIT. Our Aim is providing a platform for many kind people to help
those in need and those in need to get help. Hence this not only contributes to the society but also enables people
to help many others in today's busy world.</p>

## CSS FILES

This screenshot shows the Visual Studio Code editor with the file `All_Charity.css` open. The Explorer sidebar on the left shows the project structure for `ADMINCHARITY`, including `Assets`, `partials`, and various PHP files like `_dbconnect.php`, `_nav.php`, `All_Charity.php`, `Dashboard.php`, `deleteCharity.php`, `deleteUser.php`, `Login_admin.php`, `logout.php`, `Requests.php`, `users.php`, and `users.css`. The main editor area displays the following CSS code:

```
85 .navbar-links li {
86     list-style: none;
87 }
88
89 .navbar-links li a {
90     font-size: 1.5rem;
91     text-decoration: none;
92     color: azure;
93     background-color: #CC2D43;
94     height: 60px;
95     padding: 15px 20px;
96     display: block;
97 }
98
99 .navbar-links li a: hover{
100     background-color: #337ab7;
101     color: white;
102 }
103
104 #a03{
105     background-color: #337AB7 !important;
106 }
107
108 .upper-body {
109     background-color: #ECF0F1;
110     color: #1E212D;
111 }
```

The status bar at the bottom indicates the cursor is at line 1, column 1, with 4 spaces, UTF-8 encoding, CRLF line endings, and CSS syntax highlighting.

This screenshot shows the Visual Studio Code editor with the file `Dashboard.css` open. The Explorer sidebar on the left shows the project structure for `ADMINCHARITY`, including `Assets`, `partials`, and various PHP files like `_dbconnect.php`, `_nav.php`, `All_Charity.php`, `Dashboard.php`, `deleteCharity.php`, `deleteUser.php`, `Login_admin.php`, `logout.php`, `Requests.php`, `users.php`, and `users.css`. The main editor area displays the following CSS code:

```
202 background-color: #CC2D43;
203 overflow-y: scroll;
204 width: 100%;
205 height: 425px;
206 scroll-behavior: smooth;
207 }
208
209 #head tr th {
210     background-color: #C4C4C4;
211 }
212
213 th, td {
214     text-align: left;
215     padding: 8px;
216 }
217
218 tr:nth-child(even) {
219     background-color: #eee;
220 }
221
222 tr:nth-child(odd) {
223     background-color: #fff;
224 }
225
226 .table-footer {
227     background-color: #C4C4C4;
228     margin-top: -15px;
229     height: 60px;
230 }
```

The status bar at the bottom indicates the cursor is at line 1, column 1, with 4 spaces, UTF-8 encoding, CRLF line endings, and CSS syntax highlighting.
